ASTEC - WAVE Teacher Training Program Report

- Overview of WAVE Global & ASTEC Charter School
- Training Objectives
- How did the WAVE Teacher Training Program at ASTEC Come About?
- Training Sessions Overview & Program Outcomes
 - Accelerated Learning
 - Mindfulness And Understanding the Mind
 - Tangible and Relevant Outcomes in a Short Time
- Teachers' Testimonials about WAVE program

- WAVE Global is a social enterprise with a mission to **help youth realize their full potential** by providing them educational tools & resources.
- **ASTEC** (*Advanced Science and Technology Education Charter*) School is a public charter school with a mission to empower, motivate and inspire learners **to reach their highest potential**.
- The high synergy in the mission of WAVE & ASTEC brought us together to a **WAVE Teacher Training Program in** Oklahoma City (OKC).
- We had a **very successful teacher training program** on July 24th, 2019 in OKC and are excited about reaching a multitude of teachers and students.

1. Have ASTEC teachers **experience the WAVE workshop** so the new accelerated and optimal learning methods learned can be implemented by ASTEC teachers in the classroom.
2. Have teachers experience first-hand, the **Mindfulness aspect of the WAVE framework** and apply in the classroom to increase student attention span.
3. Based on initial training, decide the **future path** of training a multitude of teachers through an ongoing teacher training program at ASTEC.

How did the WAVE Teacher Training Program at ASTEC Come About?

Dr. Freda Jones Deskin - Founder of ASTEC Charter schools in Oklahoma City is a very accomplished and well respected Educator in the United States. She witnessed our students demonstrating impressive skills and capabilities during the WAVE graduation ceremony and immediately saw the value in ASTEC teachers getting trained on WAVE methods of **Accelerated Learning & Mindfulness.**

WAVE delivered a teacher training program for 15 of ASTEC's elementary, middle and high school teachers in Oklahoma City in the Summer of 2019. The following slides show a glimpse of what the teachers learned and their feedback.

[Click here to read Dr. Deskin's profile](#)

Click the image above to see Video

- **Session 1**: Teachers were introduced to a new and unconventional method of learning using right brain & creative visualization methods.
- **Session 2**: After session 1, teachers experienced that their wandering mind prevented them from staying focused and therefore, information absorption was not optimal. Teachers learned Alpha meditation that increased their awareness and in turn improved their focus. Their concentration levels were high after the meditation.
- **Session 3**: Teachers experiencing better absorption, longer retention and easier recall after learning to be in control of their mind instead of being distracted by their mind.

Teachers learned unconventional super learning methods that gave them first hand experience of **accelerated learning**. In a very short time teachers experienced that a lot of complex and high volume content (*50 random words*) can be quickly absorbed, retained longer and easily recalled.

The **creative visualization method** with awareness gave them a new insight into how learning can be a joyful experience and deliver tangible & relevant outcomes.

Session-2: Mindfulness & Nature of Wandering Mind

Teachers experienced that their wandering mind **prevented them from staying focused** and therefore, information absorption was not optimal.

Teachers learned a very simple yet powerful **Alpha meditation** method that helps a child stay in the present moment, eliminating the root cause of all attention related issues.

Click the image above to play video

Session-3: Tangible outcomes

8th Grade Science teacher, Danny Porter, and Middle School teacher, Cindy Millican, **recalling large volumes of information (50 random words)** within 1 hour of training. The new and unconventional learning methods using creative visualization and the right brain triggers helped them easily absorb large amount of information given to them few minutes earlier. **Awareness of the wandering mind** through Alpha meditation helped retain all of it and therefore, recall was easy.

Teachers' Feedback About The WAVE Program

1. "The powerful insights from **Alpha meditation** has created a curiosity and motivated me to practice it twice a day everyday, like the training suggests."

..... **Jeremy Maker – Dean of Instruction**

2. "Even adults struggle with being able to focus. We get tired and lose concentration. Our students feel the same and we keep telling them to pay attention but never teach them how. Today, **I learned how to teach them to pay attention.**"

..... **School Superintendent Shannon Grimes**

3. I found the training to be not only **informative and based in research** but also entertaining and **applicable to all ages** and all subjects. Mr. Naidu models the techniques throughout his presentation and helps you to understand how to incorporate the techniques throughout your teaching to **make learning a joyful and relevant experience** which makes the learning memorable for all students."

..... **Bridget O'Connor – Elementary School Principal**

Teachers' Feedback About The WAVE Program

4. "It was very insightful to see how when we overcome the doubts of the mind about our learning abilities, we can accomplish so much with simple and powerful techniques that help us overcome the fear of abstract or unknown concepts. I learned it is important to *set aside the mind's doubts and have a growth mindset rather than a fixed mindset.*"

..... **Assistant Headmaster Tammy Russel**

5. "I am *very excited about the new knowledge* I received today and looking forward to applying this to my classroom and see how it works."

..... **Alyssa Shaffer – Middle School Teacher**

6. "I had a rough day today before I came to the training and *I had a lot going on in my mind*. In spite of all those distractions, I was able to do a very good job of memorizing and recalling information using the technique taught. Our students go through similar experiences everyday in their life and I feel good to know that this will work for them too."

..... **Randy Burghart – Personalized Learning Academy Coordinator**

Teachers' Feedback About The WAVE Program

7. "Our students sit through and learn 7 different subjects everyday and I used to wonder how will they remember so much content at the end of the day. Now I feel with these tools, we can help them remember and recall easily a wide range of topics and subjects."

..... **Jori Solt – Middle School Technology Teacher**

8. "Being able to identify the root cause of distractions and why students lose focus and concentration is a great insight. I now feel I will have **better engagement with my students** by helping them become self aware. I am already thinking of **making this meditation a part of my class** so we increase awareness in the classroom."

..... **Shaniqua Campbell – Technology Teacher**

9. "I am a very logical and analytical person and I don't allow myself to go or think outside of logic. I surprised myself today by actively engaging in the creative visualization method and accessed my creative side which I don't allow myself to do. **I am now looking forward to applying this knowledge to my high school science classes** that I teach."

..... **Danny Porter – 8th Grade Science Teacher**

Teachers' Feedback About The WAVE Program

10. "As I was going through this new concept, I found it very new and abstract and there was some resistance in my mind. But taking it slowly and step by step ensured that we stayed focused. I understand now how my students feel when they are introduced to a new concept they don't understand. Through the creative visualization method, **I learned today how we can make learning a joyful experience.**"

..... **Clarissa Urbina – Exploration, 6th Grade Teacher**

11. "As a new teacher to this school, **this was a confidence boost** to be able to get up and be in front of people that I don't know and haven't worked with. With what I was able to accomplish, I never felt it was possible and now I feel very confident about myself as a teacher."

..... **Cindy Millican – Middle School Teacher**

12. "I think it is very important to teach these new methods to children early on so they learn to become more confident about themselves. I want to see more of how this has helped Elementary and Middle school students. But **this is a very unique way to teach and learn.**"

..... **Karen Walker – 6th Grade Science Teacher**

Before Learning WAVE Techniques

Vs

After Applying WAVE Techniques

We expected our children to **pay attention**, but never taught them how.

I wondered how will children learn, **remember and recall so many topics** in so many subjects.

I was a **very logical & analytical** person and I didn't allow myself to go or think outside of logic.

It was not easy to make our students understand **new and abstract concepts**.

I always **doubted my own capabilities** and held myself back.

Now we know how to teach them to be more aware of their wandering mind using **Alpha meditation**.

With these new tools, we can help them **remember & recall wide range of topics & subjects**.

I surprised myself by actively engaging in the powerful **creative visualization method** and accessed my creative side.

I understand how my students feel when they are introduced to a new concept they don't understand. I can now **make learning a joyful experience**.

Now we know that it is **the mind that holds you back** with its discouraging thoughts. This training boosted confidence.

Here is a quick snapshot of how the teachers at ASTEC charter School felt **BEFORE & AFTER** the WAVE Teacher Training Program.

- ASTEC School Superintendent, Mr. Shannon Grimes sharing his thoughts about the WAVE teacher training program.
 - A unique program that presents a very **simple yet very powerful method** of learning.
 - For the first time, we as teachers **learned how to teach children to pay attention** and not just ask them to pay attention.
 - This program offers the **flexibility to stretch this knowledge** to other areas of their classroom responsibilities.
 - We are very excited about what we have learned and see great potential of how this can be used to **improve classroom learning experiences** for our students.

Testimonials by students, parents, community leaders

WAVE workshop opened-up communication channel between parents and kids. Kids are more confident and have a can-do attitude. As a parent it enabled us to look at them as successful adults than little kids. This completely changed how we look and treat them as we know exactly what to focus on and help them. The best way to understand WAVE is to personally experience it.

(Parent of 12 & 10 years)

WAVE workshop has changed the way I look at things in many ways and also has given me strategies not only for memorization but also to true success. These are very practical and helpful because they can be applied to help in many real life situations.

(10 year old student)

I believe that the information that we learned throughout this class was extremely valuable and important for us to learn to master our education and overall our destiny in life. The three secrets to life will always stick with me for my benefit. I thank Mr. Naidu for this experience and once in a lifetime opportunity for me to expand my learning capability.

(14 years old student)

As parents, we always invest a lot of efforts & money in the conventional education system that focuses on teaching concepts or subjects in theory perfectly, but never laid down the framework of "**how to learn efficiently**" to store and retrieve information when required. That is precisely what WAVE framework teaches the children, the methods and techniques to process, store & retrieve information in fast, stress-free & fun filled way, exactly the way our mind naturally processes. This is a massive & the best gift we can give our children to shape them up as a better individuals.

(Parent of 14 & 10 year old children)

Student Workshop Flyer

Applauded by universities, school districts board of trustees, college professors, Neuro-scientists, Principals, Teachers, School Superintendents, City council members, US Congressman, Mayor of major US city and many more eminent personalities.

OVER 3000 STUDENTS BENEFITTED
IN LAST 3 YEARS, IN...

A WAVE GLOBAL WORKSHOP

MASTER YOUR BRAIN, MEMORY AND CONCENTRATION

FREE
BOOK
WORTH
\$25

WHAT WILL STUDENTS LEARN?

- Creative visualization methods
- Seven triggers of right brain
- Unique code-based learning method
- Understand wandering nature of mind
- Powerful problem-solving principles
- Meditation to improve awareness
- Hands on problem-solving experience
- Memory principles to accelerate learning

WHAT WILL BE OUTPUTS / OUTCOMES?

- Five times faster absorption & recall
- Higher level of confidence
- Better sense of control over mind
- Improved focus and concentration
- Understanding of nature's law

AT FIRST, I THOUGHT THIS WILL BE A BORING CAMP & DID NOT WANT TO GO. BUT NOW I FEEL VERY CONFIDENT THAT THIS WILL ACCELERATE MY LEARNING.

STUDENT TESTIMONIALS

THIS IS THE FIRST PROGRAM THAT MY PARENTS SENT ME TO THAT I GENUINELY LIKED.

EXAMPLES OF WHAT STUDENTS MASTER WITHIN 3 DAYS

Learn content 2 to 3 grades higher
(AP-Bio, Physics, Chemistry, History, SAT words etc.)

For hundreds of testimonials from students, parents & community leaders, visit
